

Index to Volume 214

- Alessio M, *see* Gruarin P *et al*
Armour G, *see* Mhaskar Y *et al*
Auld AM, *see* Brereton HM *et al*

Barritt GJ, *see* Brereton HM *et al*

Berger S, *see* Kositprapa C *et al*
Bhuvaneshwaran C, Morris MD: Lysosome lipid storage disorder in NCTR-BALB/c mice: Spleen and lung lysosomes store unesterified cholesterol but differ in their phospholipid composition 15–22
Bian X, *see* Jingjing L *et al*
Brereton HM, Harland ML, Auld AM, Barritt GJ: Evidence that the TRP-1 protein is unlikely to account for store-operated Ca^{2+} inflow in *Xenopus laevis* oocytes 63–74

Canty JM Jr, *see* Kositprapa C *et al*
Chahine R, *see* Feng J *et al*

Dhalla NS, *see* Wang X
Donev RM: The type of DNA attachment sites recovered from nuclear matrix depends on isolation procedure used 103–110
Downey HF, *see* Jingjing L *et al*
Duda T, Yadav P, Jankowska A, Venkataraman V, Sharma RK: Three dimensional atomic model and experimental validation for the ATP-Regulated Module (ARM) of the atrial natriuretic factor receptor guanylate cyclase 7–14
Dunaway G, *see* Mhaskar Y *et al*

Feng J, Chahine R, Nadeau R: Influence of extracellular potassium on the antiarrhythmic effect of global preconditioning in isolated perfused rat hearts 75–80

Górski J, Żendzian-Piotrowska M, Wolfrum C, Nawrocki A, Spener F: Effect of sex and bezafibrate on incorporation of blood borne palmitate into lipids of rat liver nuclei 57–62
Gruarin P, Ulliers D, Thorne RF, Alessio M: Methionine 156 in the immunodominant domain of CD36 contributes to define the epitope recognized by the NL07 MoAb 89–95

Hansen C, *see* McWhinney CD *et al*
Harland ML, *see* Brereton HM *et al*

Itoh M, *see* Matsumura K *et al*

Jankowska A, *see* Duda T *et al*
Jingjing L, Srinivasan B, Bian X, Downey HF, Roque RS: Vascular endothelial growth factor is increased following coronary artery occlusion in the dog heart 23–30

Kaneda N, *see* Murata T *et al*
Komori S, *see* Matsumura K *et al*
Kositprapa C, Zhang B, Berger S, Canty JM Jr, Lee T-C: Calpain-mediated proteolytic cleavage of troponin I induced by hypoxia or metabolic inhibition in cultured neonatal cardiomyocytes 47–55
Kreahling JM, *see* Kuo W-N *et al*
Kuo W-N, Kreahling JM, Shanbhag VP, Shanbhag PP, Mewar M: Protein nitration 121–129

Lee T-C, *see* Kositprapa C *et al*

- Matsumura K, Komori S, Takusagawa M, Osada M, Tanabe F, Itoh M, Tamura K: Protein kinase C is involved in cardioprotective effects of ischemic preconditioning on infarct size and ventricular arrhythmia in rats *in vivo* 39-45
- McWhinney CD, Hansen C, Robishaw JD: Alpha-1 adrenergic signaling in a cardiac murine atrial myocyte (HL-1) cell line 111-119
- Mewar M, *see* Kuo W-N *et al*
- Mhaskar Y, Armour G, Dunaway G: Alteration of the levels of the M-type 6-phosphofructo-1-kinase mRNA isoforms during neonatal maturation of heart, brain and muscle 81-87
- Morris MD, *see* Bhuvaneshwaran C
- Murata T, Niimi Y, Kaneda N: Characterization of the 5'-flanking region of the rat TIS11 gene 1-6
- Nadeau R, *see* Feng J *et al*
- Nawrocki A, *see* Górski J *et al*
- Niimi Y, *see* Murata T *et al*
- Osada M, *see* Matsumura K *et al*
- Robishaw JD, *see* McWhinney CD *et al*
- Roque RS, *see* Jingjing L *et al*
- Shanbhag PP, *see* Kuo W-N *et al*
- Shanbhag VP, *see* Kuo W-N *et al*
- Sharma A, Singh M: Effect of ethylisopropyl amiloride, a Na⁺-H⁺ exchange inhibitor, on cardioprotective effect of ischaemic and angiotensin preconditioning 31-38
- Sharma RK, *see* Duda T *et al*
- Singh M, *see* Sharma A
- Spener F, *see* Górski J *et al*
- Srinivasan B, *see* Jingjing L *et al*
- Sugimoto E, *see* Yamaguchi M
- Takusagawa M, *see* Matsumura K *et al*
- Tamura K, *see* Matsumura K *et al*
- Tanabe F, *see* Matsumura K *et al*
- Thorne RF, *see* Gruarin P *et al*
- Ulliers D, *see* Gruarin P *et al*
- Venkataraman V, *see* Duda T *et al*
- Wang X, Dhalla NS: Modification of β -adrenoceptor signal transduction pathway by genetic manipulation and heart failure 131-155
- Wolfrum C, *see* Górski J *et al*
- Yadav P, *see* Duda T *et al*
- Yamaguchi M, Sugimoto E: Stimulatory effect of genistein and daidzein on protein synthesis in osteoblastic MC3T3-E1 cells: Activation of aminoacyl-tRNA synthetase 97-102
- Żendzian-Piotrowska M, *see* Górski J *et al*
- Zhang B, *see* Kositprapa C *et al*
